

Class 5 Maths Y6

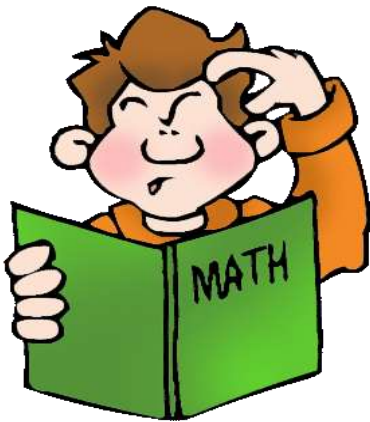

Thursday 4th March

- 1- **COTD today: 30 minutes of word problems from yesterday's sheet** in your maths book- don't forget to mark your answers- the focus is on accuracy, not speed. Any you have not got right, start by correcting these before moving on.
- 2- **Multi-step multiplication problems- challenge cards.** 30 minutes – remember to work out the answers using written calculations and then carefully answering the question. The answers to these problems are on the last challenge card so you can check and re-do if necessary.

Remember- **I need to see how you got the answer**, not just the answer.

Show all of your workings out and make it clear for the reader your method and the answer to the problem.

Good luck,
Mrs. P

Problem Solving
