

**Monday 1<sup>st</sup> March**

**Afternoon Tasks**

**Computing- The World Wide Web/ the internet- how does it all work?**

Watch these BBC bitesize short videos that help you make sense of something we all take for granted in today's digital age. Have you ever wondered how it all works? Well now you can find out.

**What is the World Wide Web?**

<https://www.bbc.co.uk/bitesize/topics/zkcqn39/articles/z2nbgk7>

**How does the internet work?**

<https://www.bbc.co.uk/bitesize/topics/z7wtb9q/articles/z3tbgk7>

Now you are going to be the expert and you are going to produce a diagram that can be used as a **poster to explain what the World Wide Web is** to others who might not know.

Make sure you take up the **whole of an A4 plain sheet of paper**. Don't use too many words or long sentences and see if you can *show* your readers how it works using what you have learnt from the videos.

It will need a **title, some labels, clear drawings and some colour**.

Make sure your **spellings are correct**.

The clearest ones will go on display in the computer room and on the newsletter- whose will it be?

Good luck digital dudes!

Mrs P
