

## Climate Change tasks

**Tuesday 19<sup>th</sup> January**

### **Biodiversity**

**Write a new date and title in your topic book.**

Look again at the **David Attenborough powerpoint** that you have seen twice now- it is saved again in today's climate change folder or click on the link:

<https://www.twinkl.co.uk/resource/uks2-a-life-on-our-planet-introduction-t-sc-2550386>

- 1-** You should already have looked at slides 1-14.

Today I want you to look at **slides 15 first**

-after watching the video, write your own **definition of biodiversity**

Now look at **slides 16 and 17**

- Write a new subheading: **'Why do we need biodiversity?'** and underneath give your own answer to this question using the slides to help you.

Next look at **slides 18 and 19**

-write subheading **'How have humans affected biodiversity?'** and explain in your own words using the slides to help you.

- write the subheading **'How does this make me feel?'** and answer the question underneath using our 'convince me' words- **because, therefore, however**

Finally look at the last few **slides 20-21** entitled **What can we do?**

- 2-** Write **definitions** (in your own words) for these words related to climate change:

**extinct**

**habitat**

**species**

**endangered**

**conservation**

Enjoy,

Mrs P
