

In Science next week we will be testing rocks.

In preparation for the lesson could you:

- While out and about on your weekend walk, collect a selection of rocks.
- Look around your garden and home too.
- You only need a few and if possible different types:
slate/marble/brick/ stone tile/ granite/chalk/stones
- You will also need a piece of sandpaper but if you haven't got any, you could use a rough pot scourer.

Many thanks and have a good weekend walking in the sunshine!
