

DAY THREE
Divide 2-digit number by 1-digit number

Activity 1: Leanna solves $36 \div 3$ like this.

Use this method to solve: $55 \div 5$ $120 \div 6$ $124 \div 4$

Activity 2: Tia is calculating $72 \div 3$. Before she starts, she says that the calculation will involve an exchange.
Do you agree? Explain why.

Activity 3: Use $<$, $>$ or $=$ to complete the statements.

$63 \div 3$ $96 \div 3$

$96 \div 4$ $96 \div 3$

$91 \div 7$ $84 \div 6$
