Function:

Name of tooth:

Function:

The diagram shows a top-down view of an open mouth. The upper arch (maxilla) contains two purple incisors, two blue canines, two green premolars, two orange molars, and two yellow wisdom teeth. The lower arch (mandible) contains two purple incisors, two blue canines, two green premolars, two orange molars, and two yellow wisdom teeth. Lines connect the following teeth to their label boxes: the top-left purple incisor to the top-left box, the top-right blue canine to the top-right box, the bottom-left yellow wisdom tooth to the middle-left box, the bottom-right green premolar to the middle-right box, and the bottom-center purple incisor to the bottom box.
