

For this week – starting on Monday, May 4<sup>th</sup> – the folder contains a set of activities to do with the five groups of vertebrate animals.

It does not matter a lot what order you choose for having a go at the activities.

First, however, read the Vertebrates Fact Sheet. This includes a short guide to each of the different groups of vertebrates so it is really, really useful for helping you tackle ALL the other activities. Read it more than once; even sit with a copy of it next to you while having a go at the rest of the activities!
