A 10x10 grid with a blue line forming a shape on the left side. The shape consists of a horizontal line at the top of the first column, extending to the right to the fourth column, then a vertical line down to the second row, then a horizontal line to the right to the fifth column, then a vertical line down to the first row, and finally a horizontal line to the right to the sixth column.

$$851 \div 23 =$$

A 10x10 grid with a blue line forming a path. The path starts at the intersection of the 4th vertical line and the 4th horizontal line, moves right to the 5th vertical line, then down to the 5th horizontal line, and finally right to the 6th vertical line.
