

The Planets of our Solar System

1. Look carefully at these two pictures.
2. Use what you see here to name the pictures (A – H) that are all mixed-up on the other page.
3. Then (if you have some coloured pens or pencils available) colour each planet with the right colours and patterns.
4. Finally, cut out the coloured planets and stick them IN THE RIGHT ORDER across a double page of an exercise book.
