

What have you learnt about the Sun, the Earth and the Moon?

1. How long does the Moon take to orbit once around the Earth?
2. How long does the Earth take to spin round once?
3. How long does the Earth take to travel once around the Sun?
4. What force makes the Earth stay near the Sun?
5. Complete this sentence:

We have daytime when...

6. What is a hemisphere of the Earth?
7. The Earth's axis is the line between the North pole and the South pole. This line is not quite vertical compared to the position of the Sun. It tilts a bit. How does this affect us on Earth?
8. The Equator is shown on all maps of the Earth. It is not a real solid line on the Earth but on the maps it is there to show... what?
